Alaa Abderrahim

Full stack developer

Detail-oriented Full Stack Developer with a passion for building scalable, efficient web applications. Skilled in front-end (HTML, CSS, JavaScript, React.js) and back-end (Node.js, SQL/NoSQL) development, API integration, and event-driven architecture. Committed to writing clean, maintainable code and delivering high-quality user experiences.

EDUCATION

Bachelor of Software Engineering

Amman Arab University, Amman
October 2021 -January 2025 GPA 3.5

THECINICAL SKILLS

- Front-End Development:

- HTML5, CSS3, JavaScript, TypeScript, Responsive Design, Cross-Browser Compatibility

- Frameworks & Libraries:

- React.js, Next.js, Angular, Material-UI, Redux , node.js

- Design & UX:

- Figma, UI/UX Principles, Accessibility, Usability

- API Integration:

- RESTful APIs, Third-Party Services, Authentication & Authorization Flows

- Cloud & Deployment:

- Vercel, Cloudflare, CI/CD Fundamentals

- Version Control:

- Git, GitHub, Branching Strategies, Code Reviews

- Development Practices:

- Agile Methodologies, Test-Driven Development, Pair Programming

- Database:

- SQL, NoSQL

EXPERIENCE

July 2024 – October 2024

Front End Developer Intern

Simplify9, Amman

- Designed wireframes and mockups for client approval prior to development.
- Built user interfaces with React.js.
- Developed reusable components for future use in other projects.
- Collaborated with back-end developers on integrating APIs into front-end solutions.
- Learned new front-end programming languages and methodologies to perform tasks.
- Created technical requirements and worked with engineering team to develop, test and launch functionality on time and with high quality.

CERTIFCATIONS

- Mobile application development using Flutter November 2022
- AWS Cloud Practitioner Essentials February 2025

PROJECTS

GitAPI

July 2024 – August 2024

- *Description:* efficient web application designed to fetch and display real-time GitHub user data. Whether you're a developer, recruiter, or open-source enthusiast, GitAPI provides a streamlined way to explore GitHub profiles, repositories, and contributions with ease.
- *Used:* React with Material-UI, framer motion, GitHub REST API

Climate tracker

August 2024 – September 2024

- *Description:* an intuitive web application designed to provide users with real-time weather updates, historical climate data, and air quality information for any location worldwide. By integrating advanced APIs like OpenWeatherMap, Climate Tracker offers interactive maps displaying various weather patterns, such as precipitation, wind, temperature, and cloud cover.
- *Used:* React with Material-UI, framer motion

Medlocator

March 2024 – January 2025

- *Description:* a system designed to alleviate the challenges individuals face in accessing necessary medications. It provides users with real-time data on medication availability, pricing, and delivery options, simplifying the process of locating nearby pharmacies. As will the system provide more functionalities such as pill identifier and symptom checker.
- *Used:* ReactJs, MySQL, HTML, CSS, TypeScript
