- **English**
  Fluent

SUMMARY

Highly motivated and Detail-oriented developer with strong passion for creating clean, efficient, and functional front-end code. Skilled at utilizing HTML, CSS, and JavaScript to develop responsive and user-friendly web interfaces, ensuring seamless user experience and minimal errors. Demonstrates solid work ethic and commitment to delivering high-quality results in timely manner.

EDUCATION

Bachelor of Software Engineering   October 2021 -January 2025
Amman Arab University, Amman

GPA 3.5

EXPERIENCE

July 2024 – October 2024
Front End Developer Intern
Simplify9, Amman

- Designed wireframes and mockups for client approval prior to development.
- Built user interfaces with React.js.
- Developed reusable components for future use in other projects.
- Collaborated with back-end developers on integrating APIs into front-end solutions.
- Learned new front-end programming languages and methodologies to perform tasks.
- Created technical requirements and worked with engineering team to develop, test and launch functionality on time and with high quality.

CERTIFCATIONS

- Mobile application development using Flutter   November 2022

PROJECTS

GitAPI
July 2024 – August 2024

- *Description:* efficient web application designed to fetch and display real-time GitHub user data. Whether you're a developer, recruiter, or open-source enthusiast, GitAPI provides a streamlined way to explore GitHub profiles, repositories, and contributions with ease.
- *Used:* React with Material-UI, framer motion, GitHub REST API

Climate tracker
August 2024 – September 2024

- *Description:* an intuitive web application designed to provide users with real-time weather updates, historical climate data, and air quality information for any location worldwide. By integrating advanced APIs like OpenWeatherMap, Climate Tracker offers interactive maps displaying various weather patterns, such as precipitation, wind, temperature, and cloud cover.
- *Used:* React with Material-UI, framer motion

Medlocator
March 2024 – January 2025

- *Description:* a system designed to alleviate the challenges individuals face in accessing necessary medications. It provides users with real-time data on medication availability, pricing, and delivery options, simplifying the process of locating nearby pharmacies. As will the system provide more functionalities such as pill identifier and symptom checker.
- *Used:* ReactJs, MySQL, HTML, CSS
